SUPPLEMENT TO
REPORT NO.

25X1A

25X1X 1. Location of the oil field: The Sipsa (?) Oil Field is southwest of Krasnodar ($45^{\circ}02'N/39^{\circ}00'E$), Krasnodar Oblast, east of Khomskaya ($44^{\circ}51'N/38^{\circ}34'E$) and south of the Novorossiisk ($44^{\circ}43'N/37^{\circ}47'E$) - Krasnodar railroad line.

2. Oil pipe line:

A pipe line was first built from this oil field to Il'skaya ($44^{\circ}51'N/38^{\circ}34'E$). It is planned to continue this twin pipe line as follows:

Il'skaya - Severskaya ($44^{\circ}51'N/38^{\circ}41'E$) - Afipskaya ($44^{\circ}30'N/38^{\circ}34'E$) - Kuban River bridge near the Krasnodar Refinery.

3. The pipe diameter is about 40 cm. The line was laid about 2 m underground. It crosses the Kuban riverbed and is a surface line across the oil stamp to the refinery.
4. Two compressor stations were built for the pumping installation. The first station is 1.5 km east of the Sipsa Oil field, the second is 2 km south of Afipskaya.
5. A heating station with four tractors and four or five oil tanks was constructed near the first compressor station.
